EXPERIENCE

Software Engineer; Leidos – Jan 2025 to Present

- Rapidly prototype innovative Salesforce solutions to optimize vital Military Health operations.
- Accelerate time-to-market for high-impact outcomes, ensuring rapid and measurable value delivery.
- Secure crucial stakeholder adoption via compelling live demos and innovative Military Health apps.

Logistics Engineer; Leidos– Apr 2024 to Jan 2025

- Facilitated technology refresh plan for FAA's E-IDS program to address system upgrades and obsolescence.
- Created hardware breakdown structure to support provisioning through top-down system evaluation.
- Conducted repair level and spares analysis to refine inventory and maintenance processes.

Integration Engineer; Leidos– Sep 2023 to Apr 2024

- Engaged with a specialized Tiger Team to fortify AWS physical security and protect vital systems.
- Optimized AI/ML algorithms to detect and neutralize potential data exfiltration threats for Amazon.
- Designed and deployed automated self-service checkpoints to enhance security in AWS data centers.
- Assisted network engineering efforts to integrate critical infrastructure into the AWS cloud.

Software Engineer; Leidos – Jun 2021 to Sep 2023

- Planned and executed infrastructure upgrades for SkyDataSentry (SDS) under the FAA's ERAM program.
- Implemented critical security measures to harden software infrastructure and guarantee compliance.
- Repaired 150+ hardware issues and upgraded 300+ servers to enhance performance and reliability.
- Boosted query speed by 30% via multiprocessing and threading to improve efficiency and responsiveness.
- Developed automation scripts to streamline routine tasks and improve operational efficiency.

Full Stack Developer; Computer Aid, Inc. – Dec 2018 to May 2020

- Modernized a Procurement Development Application for the Florida Department of Transportation.
 - Developed a Blazor/ASP.NET Core client project management tool with Azure DB integration.
 - Automated the product registration page for Greenworks using Zendesk Sunshine.
-

EDUCATION

Bachelor of Science – BS, **Computer Science**, College of Charleston

- Minor in **Data Science** | Graduated **May 2021**
-

SKILLS

- Written 10,000+ lines of Java, Python, R, C, C#, SQL, Swift, JavaScript, HTML, and CSS
 - 5+ years of experience in AI/ML, Analytics, .NET, PowerShell, Azure, Git, and 3D Printing
 - Proficient in Networking, Linux, Virtualization, Server Administration, Hardware Troubleshooting
 - Expertise in Web Hosting, DevOps Automation, Cloud Integration, and Cyber Security
-

ACTIVITIES

- Mentor Future Link students (Nov 2023–Present), guiding skill-building and career growth in SWE and AI/ML.
- Mentor CS students at CofC (Nov 2018–Present), assisting with hackathons, events, and academic growth.
- Built a Q&A app with Streamlit and Google Gemini, leveraging GenAI for interactive exploration of resume details.
- Regularly engage in programming competitions, showcasing problem-solving, algorithmic thinking, and efficiency.
