CLARE CLEVER

Charleston, SC • 205.420.9171 • robert.c.clever@gmail.com • linkedin.com/in/clareclever

EXPERIENCE

Software Engineer; Leidos – Jan 2025 to Present

- Maintain and expand a Snowflake-backed React dashboard that tracks AI usage, cost, and sprint delivery.
- Secure stakeholder adoption through live demos of Military Health apps that deliver measurable value.
- Develop Claude Code plugins and skills that automate session handoff, PR workflows, and spend tracking.
- Drive AI enablement with shared plugin marketplaces, setup guides, and an AI tooling roadmap.
- Design and engineer scalable enterprise services from reusable components, accelerating time-to-market.
- Rapidly prototype robust, adaptable Salesforce solutions to optimize Federal Military Health operations.

Logistics Engineer; Leidos – Apr 2024 to Jan 2025

- Managed logistics operations for the FAA's $292M E-IDS program, coordinating cross-functional support.
- Facilitated technology refresh plan to proactively address system upgrades and obsolescence challenges.
- Created hardware breakdown structure to support provisioning through top-down system evaluation.
- Generated warranty reports to track failures, assess provisions, and document coverage schedules.
- Conducted repair level and spares analysis to refine inventory and maintenance processes.

Security Engineer; Leidos – Sep 2023 to Apr 2024

- Engaged with a specialized Tiger Team to fortify AWS physical security and protect vital systems.
- Optimized AI/ML algorithms to detect and neutralize potential data exfiltration threats for Amazon.
- Led data collection for ML model training to boost detection and strengthen data center security.
- Enhanced security operations, reducing checkpoint processing time to under 50 seconds per user.
- Designed and deployed automated self-service checkpoints to enhance security in AWS data centers.
- Assisted network engineering efforts to integrate critical infrastructure into the AWS cloud.

Software Engineer; Leidos – Jun 2021 to Sep 2023

- Planned and executed infrastructure upgrades for SkyDataSentry (SDS) under the FAA's ERAM program.
- Facilitated the transition to virtual machines, enhancing performance and scalability while reducing costs.
- Applied critical security measures to harden software infrastructure and guarantee compliance.
- Repaired 150+ hardware issues and upgraded 300+ servers to enhance performance and reliability.
- Boosted query speed by 30% via multiprocessing and threading to improve efficiency and responsiveness.
- Implemented UI/UX enhancements to SDS, optimizing design, navigation, functionality, and accessibility.

Full Stack Developer; Computer Aid, Inc. – Nov 2018 to Jun 2020

- Modernized a Procurement Development Application for the Florida Department of Transportation.
- Developed a Blazor/ASP.NET Core client project management tool with Azure DB integration.
- Automated the product registration page for Greenworks using Zendesk Sunshine.

EDUCATION

BS **Computer Science**, Minor in **Data Science** – College of Charleston

SKILLS

- **Agentic Engineering**: Claude Code plugins and skills, MCP, generative AI, LLM spend tracking, machine learning
- **Software Architecture**: reusable components, scalable services, API design, backend-for-frontend patterns
- **Frontend Development**: React, TypeScript, JavaScript, HTML, CSS, Vite, route guards, session handling
- **Backend Development**: Node.js, Express, Python, SQL, Snowflake, data visualization (dashboards, charts)
- **Cloud and Security**: AWS, Azure, Linux, networking, server admin, DevSecOps, vulnerability remediation, FedRAMP
- **Performance Engineering**: multiprocessing, threading, in-memory databases, query optimization, throttling

ACTIVITIES

- Mentor Future Link students, guiding skill-building and career growth in software engineering and AI/ML.
- Mentor Computer Science students at College of Charleston, supporting hackathons, events, and academic growth.
- Member of the Division Two winning team at the ICPC Southeast North America Regionals programming contest.
- Member of the Upsilon Pi Epsilon Computer Science Honor Society; named Outstanding Student, CS Department.
